Antique No. 6

Simple and bold, Antique No. 6 is a warm, characterful slab serif designed for text and headline, ideally suited for screen and print. After the initial explosion of the slab form in the second and third decade of the 1800s, it was only in the second half of the century that the regular-width form was revisited, with Figgins first cutting Antique No. 6 in the 1870s (6 being the sixth form the foundry cut). Made as a single weight it quickly found its way across Europe and across the Atlantic to the United States, remaining in production until the 1970s. To a single bold weight, Paul Barnes has added a delightful italic, rarely seen in the 19th century, and five weights ranging from an elegant thin through to an emphatic and majestic bold.

THE SPANISH WAR, which began in 1739, and the French war which soon followed it occasioned further increase of the debt, which, on the 31st of December 1748, after it had been concluded by the **Treaty of Aix-la-Chapelle,** amounted to £78,293,313. The most profound peace of the seventeen years of continuance had taken no more than £8,328,354. from it. A war of less than nine years' continuance added £31,338,689 to it (Refer to James Postlethwaite's *History of the Public Revenue*). During the administration of Mr. Pelham, the interest of the public debt was reduced from 4% to 3%; or at least measures were taken for reducing it, from four to three per cent; **the sinking fund** was increased, and some part of the public debt was paid off. In 1755, before the breaking out of the late war, the funded debt of Great Britain amounted to £72,289,673. On the 5th of January 1763, at the conclusion of the peace, the funded debt amounted to £122,603,336. The unfunded debt has been stated at £13,927,589. But the expense occasioned by the war did not end with the conclusion of the peace, so that though, on the 5th of January 1764, the funded debt was increased (partly by a new loan, and partly by funding a part of the unfunded debt) to £129,586,782, there still remained (according to the very well informed author of *Considerations on the Trade and Finances of Great Britain*) an unfunded debt

EVERY INTRODUCTION to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical*, or *inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fechner's "aesthetics from above and from below."

Methodologies of Aesthetics
The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher, Baumgarten, to round out his "architectonic" of metaphysics that the science received its name, as designating the theory of knowledge in the form of feeling, parallel to that of "clear," logical thought. Kant, Schelling, and Hegel, again, made use of the concept of *the Beautiful* as a kind of keystone or cornice for their respective philosophical edifices. Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics "von unten."

The State of Criticism
The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of "the plain man" in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or "Doctrine of Taste," as he called it, was

EVERY INTRODUCTION to the problems of aesthetics begins by acknowledging the existence and claims of two methods of attack—the *general, philosophical, deductive*, which starts from a complete metaphysics and installs beauty in its place among the other great concepts; and the *empirical*, or *inductive*, which seeks to disengage a general principle of beauty from the objects of aesthetic experience and the facts of aesthetic enjoyment: an example of Fechner's "aesthetics from above and from below."

Methodologies of Aesthetics

The first was the method of aesthetics par excellence. It was indeed only through the desire of an eighteenth-century philosopher, Baumgarten, to round out his "architectonic" of metaphysics that the science received its name, as designating the theory of knowledge in the form of feeling, parallel to that of "clear," logical thought. Kant, Schelling, and Hegel, again, made use of the concept of *the Beautiful* as a kind of keystone or cornice for their respective philosophical edifices. Aesthetics, then, came into being as the philosophy of the Beautiful, and it may be asked why this philosophical aesthetics does not suffice; why beauty should need for its understanding also an aesthetics "von unten."

The State of Criticism

The answer is not that no system of philosophy is universally accepted, but that *the general aesthetic theories* have not, as yet at least, succeeded in answering the plain questions of "the plain man" in regard to concrete beauty. Kant, indeed, frankly denied that the explanation of concrete beauty, or "Doctrine of Taste," as he called it, was possible, while the various definers of beauty as "the union of the Real and the Ideal" "the expression of the Ideal to Sense," have done no more than he. No one of *these* aesthetic systems, in spite of volumes of so-called application of their principles to works of art, has been able to furnish a criterion of beauty. The criticism of the generations is summed up in the mild remark of Fechner, in his "Vorschule der Aesthetik," to the effect that the philosophical path leaves one in conceptions that, by reason of their generality, *do not well fit* the particular cases. And so it was that empirical aesthetics arose, which does not seek to answer those plain questions as to the enjoyment of concrete

No one of *these* aesthetic systems, in spite of volumes of so-called application of their principles to works of art, has been able to furnish a criterion of beauty. The criticism of the generations is summed up in the mild remark of Fechner, in his "Vorschule der Aesthetik," to the effect that the philosophical path leaves one in conceptions that, by reason of their generality, *do not well fit* the particular cases. And so it was that empirical aesthetics arose, which does not seek to answer those plain questions as to the enjoyment of concrete

SITUATIONIST INTERNATIONAL (SI) was a group of international revolutionaries founded in 1957. With their ideas rooted in Marxism and the 20th century European artistic avantgarde, they advocated experiences of life being alternative to those admitted by the capitalist order, for the fulfillment of human primitive desires and the pursuing of a superior passional quality. For this purpose they suggested and experimented with the construction of situations; the setting up of environments favorable for the fulfillment of such desires. Using methods drawn from the arts, they developed a series of experimental fields of study for the construction of such, like unitary urbanism.

The sense of constructing situations is to fulfill human primitive desires and pursue a superior passional quality. From *Internationale Situationiste #1*: "This alone can lead to the further clarification of these simple basic desires, and to the confused emergence

ABOUT THE DESIGNER

Paul Barnes (born 1970) is a graphic and type designer, and a partner with Christian Schwartz in Commercial Type, a type foundry based in London and New York. He has also been a long term collaborator with Peter Saville which has resulted in such diverse work as identities for Givenchy, 'Original Modern' for Manchester, the England football team kit and the logo for Kate Moss.

Barnes has also been an advisor and consultant on numerous publications, notably *Wallpaper*, Harper's Bazaar* and *frieze*. His interest in the modern and vernacular is encompassed in his type design ranging from the contemporary such as for Björk, through to the extensive Chiswick typeface (2017). Whilst consultant to *The Guardian* he designed Guardian Egyptian with Christian Schwartz. He has designed typefaces for the National Trust in England, the numbers for Puma at the 2010 World Cup and also the England football team for Umbro. For Commercial Type he has codesigned Publico with Schwartz, and independently Austin, Dala Floda and Marian.

Following the redesign of *The Guardian,* as part of the team headed by Mark Porter, Barnes was awarded the Black Pencil from the D&AD. They were also nominated for the Design Museum 'Designer of the Year'. In September 2006, with Schwartz he was named one of the 40 most influential designers under 40 in *Wallpaper**. A year later *The Guardian* named him as one of the 50 best designers in Britain.
